File integrity
The report package includes the supplied source bytes, preserved screenshots and a separate metadata JSON with file sizes, SHA-256 hashes and available capture fields. Displayed previews and this PDF are presentation derivatives. The original supplied bytes remain in the sources folder.

Limits
The reported post URL is the one associated with the existing post-specific evidence page. The supplied screenshots do not independently establish its address or current availability. No unknown carousel number has been invented. This evidence packet does not guarantee a platform decision.
