Scope and source notes: Metro entrance and balcony are excluded. The archway source is an edited full-resolution copy with limited metadata. The exact open-book source is a 1536 x 2048 copy without EXIF. Supporting alternates are not replacements for the exact frame.

The following pages preserve supplied screenshots and pair each with the best available matching source. File-specific metadata and hashes are included. Capture metadata is reported as embedded; it does not independently prove authorship.

File integrity
The report package includes the supplied source bytes, preserved screenshots and a separate metadata JSON with file sizes, SHA-256 hashes and available capture fields. Displayed previews and this PDF are presentation derivatives. The original supplied bytes remain in the sources folder.

Open-book frame check
The matched frame is PXL_20260814_095326541.jpg. Newly supplied 095236226, 095240973, 095332212 and 095400680 are alternate frames: hand position, page angle or camera viewpoint differs. Full-resolution sequence files are supporting evidence only.

Limits
The reported post URL is the one associated with the existing post-specific evidence page. The supplied screenshots do not independently establish its address or current availability. No unknown carousel number has been invented. This evidence packet does not guarantee a platform decision.
